In the claims:

Please use the claims as shown below:

5

1. (Currently amended) A method for navigating in a <u>handheld</u> computer device containing medical information, comprising:

providing <u>a handheld computer device having</u> a first medical <u>plug-in</u> module ~~(12, 14, 16, 18, 20, 22, 24, 26, 28, 30)~~ and a

10   second <u>plug-in</u> medical module ~~(12, 14, 16, 18, 20, 22, 24, 26, 28, 30)~~ of a module menu, the first medical module being different from the second medical module:

providing a display ~~(200)~~ <u>in the handheld computer device for</u> displaying the module menu ~~(204)~~ and a bookmark activation

15   device ~~(228)~~ for activating a bookmark module ~~(290)~~;

selecting the first medical module from the module menu and marking a first information segment in the first medical module as a first bookmark;

selecting the second medical module and marking a second

20   information segment in the second medical module as a second bookmark, the first and second bookmarks being stored in the bookmark module ~~(290)~~; and

activating the bookmark activation device to activate and display the ~~second~~ bookmark module<u>;</u>

25   <u>while in the bookmark module, moving directly from the first</u> <u>bookmark to the second bookmark without restarting the second</u> <u>module;</u>

while in the bookmark module, switching from the first module

to the second module;

displaying a sentence being longer than a width of a display

of the handheld computer device so that an entire sentence is

5   not shown in the display;

tapping on the sentence with an electronic pen and holding the

electronic pen on the sentence; and

the display displaying the entire sentence in a dialogue box.

10   2. (Currently amended) The method according to claim 1

wherein the method further comprises activating a module menu

tab 292 in the bookmark module ~~(290)~~ and selecting the first

medical module to trigger the bookmark module to display the

first bookmark.

15

3. (Original) The method according to claim 1 wherein the

method further comprises, selecting the second medical module

so that the bookmark module displays the second bookmark.

20   4. (Currently amended) The method according to claim 1 wherein

the method further comprises activating a flash memory ~~(224)~~

to display a latest search command.

5. (Original) The method according to claim 1 wherein the

25   method further comprises associating the second medical module

to the first bookmark while the first bookmark is associated

with the first medical module.

6. (Currently amended) The method according to claim 1 wherein
the method further comprises clearing a memory cache (298)
5   containing all bookmarks.

7. (Currently amended) The method according to claim 1 wherein
the method further comprises activating a back arrow (222).

10   8. (Currently amended) The method according to claim 1 wherein
the method further comprises activating a forward arrow (220).

9. (Original) The method according to claim 1 wherein the
method further comprises using a word processing header H1,
15   ..H7 to create hierarchical conversion of documents.

10. (Original) The method according to claim 1 wherein the
method further comprises using a link to move within a module
and move to another module and using an expanding link to
20   expand a text portion between existing links.
